

Afiavi Elisabeth DORKENOO

Full Stack Developer · Data Engineer · ML

✓ Available immediately

📍 Île-de-France & beyond

🚗 Full driving licence

Full Stack by day, Data Engineer by night — I turn raw data into useful products, from banking transactions to real-time audio streams.

LANGUAGES

French — Native
English — Professionnel (TOEIC 795)

TECHNICAL SKILLS

LANGUAGES

JavaScript TypeScript Python Java
Dart Go PHP Bash

FRONTEND

React.js Vue.js Next.js Angular
Flutter HTML5/CSS3 Tailwind CSS
shadcn/ui Recharts Chart.js Quill.js

BACKEND

Node.js FastAPI Spring Boot
.NET Core Django Flask Express.js
GraphQL JWT Zod

DATA & ML

pandas NumPy scikit-learn
Apache Spark SciPy Pydantic
BigQuery ffmpeg

DATABASES

PostgreSQL MySQL MongoDB SQLite
Redis Prisma ORM

REAL-TIME & ASYNC

WebSocket SSE asyncio

CLOUD & DEVOPS

AWS Docker GitHub Actions GCP
Azure nginx Kubernetes Terraform

TESTING & API

REST API Postman Swagger/OpenAPI
Jest Pytest Cypress

TOOLS

Git/GitHub Jira VS Code IntelliJ
Figma Notion jsPDF

CERTIFICATIONS

- AWS Cloud Computing
- Azure Fundamentals
- Agile Scrum Master (ASM)

WORK EXPERIENCE

EGA Financial Services (EFS) June 2022 – June 2025 (alongside apprenticeship at BPCE)
Full Stack Developer — Freelance

Development of a multi-channel payment platform (mobile, web, card) in a startup environment: back-end API design and development, Vue.js and React interfaces, Flutter/Dart mobile app and AWS deployment. Unit and integration testing to ensure payment flow security and reliability. Database modelling and cloud infrastructure monitoring.

.NET Core Vue.js React Flutter/Dart PostgreSQL MySQL AWS REST API

BPCE Group Nov 2023 – Nov 2024
Junior Data Engineer — Apprenticeship

Development of technical enablers and data pipelines based on client needs, creation and management of sprint tickets in an Agile team. Collection, processing and analysis of financial data in collaboration with Data teams. Technical documentation writing, skill development in Java, Spring and Maven.

Java Apache Spark Spring Maven Angular GCP BigQuery SonarQube Checkmarx

BGFI Bank May – Aug. 2022
Data Engineer — Internship

Development of SQL scripts (Informix, MySQL, SQL Server) to automate the conversion of Excel files into standardised accounting formats for regulatory reports submitted to the central bank. Validation of data accuracy over several months of creditor and debtor data. Results formatted with Jaspersoft Studio and technical documentation written.

SQL Informix MySQL SQL Server ETL Jaspersoft Studio

Agritrade Africa SARL Apr – Sep 2021
Front-End Developer — Internship

Design and launch of a WordPress e-commerce marketplace with MySQL database integration. Field content collection (product photos, production site visits), product integration, payment flow configuration and end-to-end purchase experience validation.

WordPress MySQL HTML/CSS
