PROFESSIONAL EXPERIENCE

EGA Financial Services (EFS)

Full Stack Software Engineer — Contract

Jun 2022 – Jun 2025 (concurrent with BPCE work-study program)

Built a multi-channel payment platform (mobile, web, card) in a startup environment: designed and developed the back-end API in **.NET Core** exposed as a **REST API**, **Vue.js** and **React** interfaces, a **Flutter/Dart** mobile app, and deployment on **AWS**. Wrote unit and integration tests to ensure the security and reliability of payment flows. Modeled **PostgreSQL** and **MySQL** databases and monitored cloud infrastructure.

BPCE Group

Junior Data Engineer — Work-Study Program

Nov 2023 – Nov 2024

Developed technical enablers and data pipelines with **Apache Spark** on **GCP** and **BigQuery** based on client needs, and created and managed sprint tickets within an Agile team. Collected, processed, and analyzed financial data in collaboration with Data teams and **Angular** interfaces. Wrote technical documentation, upskilled in **Java**, **Spring**, and **Maven**, and performed code quality checks with **SonarQube** and **Checkmarx**.

BGFI Bank

Data Engineer — Internship

May – Aug 2022

Developed **SQL** scripts (**Informix**, **MySQL**, **SQL Server**) for ETL processes to automate the conversion of Excel files into standardized accounting formats submitted to the central bank for regulatory reporting. Validated data accuracy across several months of creditor and debtor data. Formatted results with **Jaspersoft Studio** and wrote technical documentation.

AgriTrade Africa SARL

Front-End Software Engineer — Internship

Apr – Sep 2021

Designed, built **HTML/CSS** integration for, and launched an e-commerce marketplace on **WordPress** with a **MySQL** database. Collected on-site content (product photos, production site visits), integrated products, configured payment flows, and validated the end-to-end purchase experience.
